## The wonderful OOAD / LTOOD split: effect on team composition

- Those students taking only OOAD are not required to complete the labs dealing with implementation
- Therefore, make sure when building up your team that it consists entirely of:
  1. students taking OOAD only, or
  2. students taking OOAD + LTOOD

Miguel Garcia – STS

## Milestones

- For each milestone, you're expected to:
  - submit to our Subversion server the source code and supporting code.
  - Additionally, offer a presentation and be ready for open discussion. All students show up for presentations (yes, it'll be a long afternoon)
- Submitting to Subversion is made possible with an Eclipse plugin: <http://subclipse.tigris.org/>  
More details (server address, password) on the online group
- The milestones:
  - November 20th, Implementational Design
  - January 15th, Implementation
  - January 29th, No presentation but final submission to Subversion of all deliverables (design docu as a minimum).  
No further submissions accepted after this deadline.
